

STRATEGIC PARTNERSHIP OVERVIEW

JUNIPER NETWORKS

Leveraged for Success

- Elite Partnership Status
- Expert-Level Certified Engineers
- Extensive Platform Specific Experience & Knowledge
- Gained Efficiencies from Strategic Distributor Relationships
- Secure Supply Chain
- Flexible Onsite Availability
- Best Practice Project Management and Engineering Methodologies

Network Infrastructure Services

- Architecture Design & Deployment
- Cyber Defense Infrastructure
- Modernization / Optimization
- Assessment / Compliance
- Migration / Refresh
- Customized Engineering Block Schedules

Proven Past Performance

- Enterprise
- K-12 and Higher Education
- Service Provider
- State and Local Government

Innovate Through Partnership, Expertise & Experience

Copper River IT, together with Juniper Networks, design and deploy innovative infrastructures that are open, reliable, and trusted. Our elected partnership status guarantees the delivery of maximum value solutions across the full Juniper solution portfolio. Copper River IT Juniper-certified technologists assist with the entire range of Juniper products and solutions from planning to configuration and installation to management and support.

Engineering Simplicity to Enable Your Multicloud Journey

Juniper Networks simplifies the complexities of networking with products, solutions and services in the cloud era to transform the way we connect, work and live. Pairing Juniper's corporate vision with Copper River IT's deep technical expertise and proven vertical specific experience provides the opportunity for our customers to move along the multicloud journey with ease and confidence.

Whether you are planning a full-scale data center transition or executing a routine technology refresh Copper River IT ensures your requirements receive the expertise and attention to guarantee project success. Our full suite of Enterprise Networking products and solutions include:

- Application Management & Orchestration
- Identity & Policy Control
- Network Edge Services
- Network Management & Operations
- Route / Switch / Security
- Software-Defined Networking

Collectively, we have an established record for applying network innovation to enable seamless operations from the endpoint to the data center and the cloud.

Company Overview

Since our inception, Copper River Information Technology continues to transform the way our clients do business. As a Federally Recognized Alaskan Tribal Disadvantaged Business, owned by the Native Village of Eyak (NVE), we deliver high-performance IT solutions and services based on our unique advantage of holding elite-level partnerships with today's most innovative technology manufacturers. We combine these impressive product portfolios with our extraordinary engineering, design and professional services expertise to craft a complete, end-to-end technology solution unique to our clients' needs. Some of the innovative solutions and services we offer enable Cyber Security, Data Center & Cloud Architectures, Enterprise Networks and Mobility.

At a Glance

- Federally Recognized, Alaskan Tribally Owned Disadvantaged Business
- Founded in 2006
- ISO 9001:2008 Certified
- SBA 8(a) Graduate | 2015

Contract Roster

- *Federal Vehicles*
 - NASA SEWP V (Prime Group C&D)
 - Navy SPAWAR
- *State, Local & Education Vehicles*
 - Maryland Education Enterprise Consortium (MEEC)
 - State of Tennessee MBE
 - State of Wisconsin MBE
 - Virginia Information Technologies Agency (VITA)

Application Management & Orchestration

Ensure public, private, and hybrid clouds run at ideal capacity, providing consistent operational intelligence across the network.

Identity and Policy Control

Integrate subscriber privileges, application requirements, and business policies within the IP network infrastructure.

Network Edge Services

Provide carrier-grade NAT and IPv6 transition technologies with Network Monitoring applications that enable fault isolation, troubleshooting, capacity planning, SLA validation, analysis, and reporting.

Route

A comprehensive, scalable, and secure portfolio of routers for enterprise and service provider networks.

- **MX Series 5G Universal Routing Platforms:** TA robust portfolio of SDN-enabled routing platforms that provide industry-leading system capacity, density, and performance with unparalleled longevity. MX Series routers are key to digital transformation for service providers, cloud operators, and enterprises.
- **PTX Series Packet Transport Routers:** PTX Series routers form the foundation of the Converged Supercore® architecture, providing performance, optical transport integration, and elegant deployment. They support high-density 100GbE environments, with energy efficiency of less than half a watt per Gbps.

Switch

Improve the economics of networking with cloud-grade, high-density Ethernet switching across your data center, campus, and branch.

- **EX Series Ethernet Switches:** These cloud-grade switches are designed for the converged enterprise branch, campus, and data center, and for service providers. They address growing enterprise demands for high availability, unified communications, and virtualization.
- **QFX Series Switches:** QFX Series switches satisfy the needs of today's most demanding enterprise and service provider data center environments. This high-performance, high-density platform is designed for top-of-rack, end-of-row, and spine-and-core aggregation deployments.

Security

High-performance security with advanced, integrated threat intelligence, delivered on the industry's most scalable and resilient platform. SRX Series firewalls set new benchmarks with 100GbE interfaces and feature Express Path technology, which enables up to 2-Tbps performance for the data center.

Software-Define Networking

Future-proof for the cloud era with an open SDN solution that provides high performance, elasticity, and security.
