Enable Your Workforce

Today, the competition is relentless — and coming at you from every angle. To prevail, you need to make sure your workforce has everything they need to succeed. That includes high performance and availability from the business applications they rely on, as well as an efficient IT environment that shaves costs, simplifies management and maintenance, and speeds time to productivity.

As a Dell EMC Premier Partner, Copper River has achieved top level accreditation providing customers assurance that expert level certified professionals are helping to manage and maximize their IT environment. Our elected partnership status guarantees the delivery of maximum value solutions across the complete Dell EMC product portfolio. Together, Copper River and Dell EMC provide the end-to-end capabilities that enable your workforce through digital transformation, offering solutions and services that reach from edge to core to cloud.

Accelerate Performance with Purpose-Built Solutions

The digital economy offers exciting new opportunities, but it also brings unprecedented IT challenges. As new software, hardware, and other solutions are introduced, the old are discontinued and unsupported — and organizations that don't adapt and adopt quickly won't survive.

In partnership, Dell EMC and Copper River deliver easy to purchase, deploy and manage purpose-built solutions. Refresh outdated technologies with the latest innovations to accelerate performance for business applications. Fast, high-performance infrastructure enables real-time responsiveness, quick results and increased productivity. Our solutions enable faster time to production, shorten the design cycle and configuration time. Multiple configuration options provide flexibility to build a properly sized and tested configuration that is optimized for your performance goals. Once deployed, Dell EMC and Copper River solutions provide you with the ability to manage everything with a few tools to simplify administration.

Company Overview

Since our inception, Copper River Information Technology continues to transform the way our clients do business. As a Federally Recognized Alaskan Tribal Disadvantaged Business, owned by the Native Village of Eyak (NVE), we deliver high-performance IT solutions and services based on our unique advantage of holding elite-level partnerships with today's most innovative technology manufacturers. We combine these impressive product portfolios with our extraordinary engineering, design and professional services expertise to craft a complete, end-to-end technology solution unique to our clients' needs. Some of the innovative solutions and services we offer enable Cyber Security, Data Center & Cloud Architectures, Enterprise Networks and Mobility.

Ignite Innovation Today

In this digital economy, organizations are looking to technology as a competitive differentiator in driving higher engagement with customers, enabling new business models and staying ahead of the competition. CIOs are at the core of the transformation agenda, balancing between operational efficiency and forward-thinking projects. In both instances, servers are the bedrock of the modern software-defined data center and the key to building a flexible, efficient and cloud-enabled infrastructure. Learn more now about how Dell EMC PowerEdge Server Solutions deliver a worry-free infrastructure that is secure and scalable, with no compromises.

Perfect Mix of Simplicity & Power

Organizations today, especially mid-size organizations, are faced with increased complexity--data growth, application diversity, increased numbers of users, and resource constraints--driving the need for solutions that enable them to do more with less. Dell EMC IDPA provides the perfect mix of simplicity and power for mid-size organizations and ROBO environments while also delivering the lowest cost-to-protect and is guaranteed under the Future-Proof Loyalty program. Learn more now about how Dell EMC is helping customers modernize their data protection installations and replace legacy backup applications.

Transform HCI Networking and Enhance Simplicity

Dell EMC VxRail accelerates and simplifies IT through standardization and automation. With VxRail, you don't just deploy a server, you transform your infrastructure. VxRail provides a simple, cost effective hyper-converged solution that solves a wide range of your challenges and supports almost any use case, including tier-one applications and mixed workloads. Dell EMC enables faster, better, and simpler delivery of virtual desktops, business-critical applications, and remote office infrastructure. Dell EMC VxRail invests in the complete lifecycle, including advanced automation, making it easier for you from day one forward, allowing you to further simplify IT infrastructure and operations. Dell EMC VxRail is proven to dramatically reduce OPEX and unplanned downtime.

Simple, Efficient & Responsive

If you are looking for rich features and absolute simplicity in a small footprint, if you are cost-conscious and need the best from the best, Dell EMC Unity Hybrid Flash is for you. Designed for flash with rich data services, hybrid architecture delivers flash performance with the cost advantage of disk and is the perfect fit for your mixed applications, unified storage and Remote-Office-Branch-Office (ROBO) requirements. Learn more now about Dell EMC Unity Hybrid-Flash solutions.
